How to change MUNET and Windows passwords

1. To change your MUNET password, go to the following link:
   HTTP://www.pfd.muohio.edu/intranet
   follow the instructions when prompted.

2. To change your Oracle (Banner) password, go to the following link:
   HTTP://www.muohio.edu/oraclepassword

3. After you have successfully changed your MUNET password, use the new password when you login to Novell. *(See Figure 1)*

4. The following screen will appear. *(See Figure 2)* This is the windows 2000 / XP password.
5. You must select the check box that indicates how to match your password with NetWare after a successful login.

6. Type your new MUNET password in the password field above.

7. If you typed it in successfully, the workstation will continue to boot and you will not see this screen until the next password change.
